This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101017454

We invite you to save the date for the 21st of September at 10 AM and to join the virtual workshop on remote work and remotization of infrastructure for research and innovation.

During this workshop Toni Šćulac from UNIST will present his experience with remote work on CERN infrastructure. It will be a great opportunity to ask Toni questions and to give feedback for a case study which we are about to develop in the scope of task 2.3 of reSEARch-EU project.

The workshop will also open a discussion on examples and insights into remote work.

Please register under the following link: **Meeting Registration - Zoom**
